

GREENS

where life meets water

SHOWERS

At Greens, we understand water.

At Greens, we understand water. We understand about water pressure. We understand that water is a scarce resource. We understand that each market we operate in has specific standards and requirements about the products that deliver water. Most of all we understand that in many ways we are all connected by water.

Water connects us all. It informs and inspires us and it energizes our relationship with life.

At Greens we understand this. We understand that identifying what type of water pressure you have in your home is vital when deciding on tapware and shower products. No matter where you live, what your lifestyle, or your water pressure, Greens products use technology specifically designed for both form and function to inspire you to create an incredibly functional and desirable space.

Greens – where life meets water

New Zealand Innovations

QL CARTRIDGE TECHNOLOGY

Residential water pressure is affected by several influences including the type of hot water system you use, the water supply feeding your home and the height of your residence in a multi-level dwelling. Therefore choosing the right tapware and showers for your home can seem daunting.

Greens make it easy. We have a number of ranges specifically designed to work on low pressure or gravity fed systems using our unique Greens QL Cartridge. And even if you don't know what water pressure you have, these Greens ranges will work on high pressure systems as well.

Suitable for installations from 20kPa to 1000kPa.

RainBoost®

RainBoost®

For a shower as perfect as a good night's sleep, try the new RainBoost® shower by Greens for a world of difference in your daily showering experience.

RainBoost® shower technology has been specifically designed and developed for varying water pressure conditions. Engineered to maximise shower flow and coverage out of low pressure water systems down to 20kPa, as well as performing on high water pressure systems.

For unrivalled performance on all pressures ensure you combine your RainBoost® with a Greens QL Technology shower mixer.

Single Function Handset

PRODUCT CARE & MAINTENANCE

Maintenance of the finish of your tapware is important. Here are a few simple tips to follow:

Chrome Finish

Chrome plated surfaces should be cleaned with a soft damp cloth using water with liquid detergent or soap, then wiped dry to avoid water spots.

Do not use cleaning agents containing a corrosive acid or scouring agent, as well as cream cleaners (they are abrasive), as they may damage the surface which can void your warranty.

Other Finishes: Matte Black | Brushed Nickel | Brushed Stainless | Brushed Brass | Gun Metal

Surfaces need to be cleaned regularly with a soft damp cloth using water with liquid detergent or soap, then wiped dry to avoid water spots.

Do not use cleaning agents containing a corrosive acid or scouring agent, as well as cream cleaners (they are abrasive), as they may damage the surface which can void your warranty.

Stainless Steel 304

Stainless steel surfaces should be cleaned with a soft damp cloth using water with liquid detergent or soap.

Do not use cleaning agents containing a corrosive acid or scouring agent, as well as cream cleaners (they are abrasive), as they may damage the surface which can void your warranty.

Stainless Steel 304 is suitable for most outdoor installations but not in coastal areas. Stainless steel surfaces should be cleaned weekly with liquid detergent or soap and water, then sprayed with fresh water and then wiped dry. If water spots accumulate on the surface, clean by applying a 50/50 solution of water and white vinegar, spray with fresh water and then wipe dry.

WARRANTY

All Greens showers have a 10 year replacement warranty. For full warranty details, please visit our website www.greenstapware.com.
